Detail

Product Features

- A wide range of lifting and straddle options provide convenient lifting and seating, effectively reducing the risk of collisions during operation.
- Equipped with an emergency stop button and a manual emergency descent device to ensure patient safety.
- Advanced motor with durable and strong load capacity.
- 360° hanger bar rotation allows for easy body position adjustment during transportation.
- Medical-grade silence level ensures quiet operation without disturbing others and without wearing down the floor.
- At just 12 cm from the floor, it can be easily pushed into narrow spaces such as under the bed.
